

K3 Brute Corner Guard

K3 Brute is the strongest corner protector on the market. Designed in-house, the K3 Brute will protect all the vulnerable corners in a facility from lift truck impacts. Building corners, dock door guides, rack end-of-row corners and more can all benefit from this rugged safety product.

K3 Brute is 24"-high, made from half-inch thick steel, weighing in at 115 pounds, and fastened down with six concrete anchors. It's designed to take heavy impacts and shrug them off.
