

Wire Deck

Wire deck is a product that works with pallet racks to provide support, safety, quality, strength and reliability to warehouse racks. Wire decks are easy to install (they simply drop into place) and allow high visibility through all levels of pallet racking.

In addition to providing protection from falling inventory, wire decking can improve air circulation and prevent dust build-up. Wire decks can also help increase overhead sprinkler effectiveness, and many local fire codes require them instead of particle board or plywood. DAK can source a wide range of options, configurations and applications to serve your pallet racking needs. We stock much of our wire decking, which results in shorter lead times.

Wire Deck

Wire Deck may solve your warehouse problem if you would like:

- Flexibility to store cartons, drums, and multiple pallet sizes
- A solution that is easy to install
- To improve fire safety in your facility
- Extra protection for employees and products
- To improve inventory visibility and brightens your facility
- A self-cleaning / maintenance free solution

Wire deck comes in many styles:

- Inside waterfall
- Flat flush
- Inverted flare
- Inverted U-channel
- Standard U-channel
- Flared channel
- Galvanized or powder-coated
